¹ All fees are inclusive of the net effect of GST. No fees are payable to Magellan in respect of its management of the Support Trust's assets.

[†] NAV is cum distribution and therefore includes the distribution amount of AUD 2.050 cents per unit.

[^] Target Monthly Income x 12 / NAV price at end of month. There is no guarantee that the Target Monthly Income will be achieved.

² The number of months over which the support trust could fund 100% of the Target Monthly Income of FuturePay, calculated as (Support Trust NAV) / (Units on Issue x Target Monthly Income).

For the most up to date/live figures please refer to our website at www.magellanfuturepay.com.au.

Fund Performance

	1 Month (%)	3 Months (%)	Since Inception (%) [#]
Investor Distribution	0.3	1.0	1.8
Capital Growth ³	1.2	-1.7	1.9
FuturePay Total Return ⁴	1.5	-0.7	3.7
Investor Return ⁵ (to exit price)	-6.1	-8.1	-4.1

[#] The inception date is 2 June 2021 (inclusive).

³ Growth in the FuturePay NAV per Unit excluding distributions.

⁴ FuturePay Total Returns are based on NAV prices with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees, entry fees (if applicable) and the Mutualisation Amount.

⁵ This Investor Return shows the impact of withdrawing Units directly with the Fund, where the exit price received will be the NAV per Unit less the Mutualisation Amount and an allowance for transaction costs. This Investor Return calculation is based on exit prices with distributions reinvested, but on the basis that the Mutualisation Amount is only applied on the last day of the period, after ongoing fees but excluding individual tax, member fees and entry fees (if applicable). Please note that investors also have the ability to sell units on the Chi-X securities exchange, which may result in different Investor Returns to the Investor Returns when Units are withdrawn directly with the Fund.

Why Invest in FuturePay?

FuturePay is an innovative new fund which aims to deliver investors, particularly retirees, with:

- ✓ A predictable monthly income that grows with inflation
- ✓ Capital growth with a focus on downside protection
- ✓ A reserving strategy and income support
- ✓ Daily access to your capital.

Fund Features

- A listed, actively managed fund focused on downside protection.
- Invests in a carefully selected portfolio of high-quality global companies. Current allocation 55% Global equities and 45% Global Infrastructure.
- Alongside FuturePay sits the Support Trust, which together with FuturePay aims to provide capital reserving and an income support function during poor market conditions. This is further supplemented by a Magellan Reserve Facility.
- Investors have the potential to benefit from the capital reserves accumulated in the Support Trust by past and existing members, pooling reserves with other members can be more effective.
- FuturePay is available on the Chi-X securities exchange (ticker: FPAY) and can be bought and sold like any listed security. Investments can also be made directly with the fund itself.
- Reserve contributions are paid to Support Trust from the assets of FuturePay and reflect a cost of investing, however, investors are expected to benefit from these in the future in the form of income support received during poor market conditions

This combination of FuturePay's investment strategy, coupled with the Support Trust and a Magellan Reserve Facility to provide reserving and income support to help manage volatility, all in a single product, is what makes FuturePay unique.

"Reserving is the unique feature of FuturePay. Once we understood the power and the benefits of reserving, we set about trying to think of what the best reserving strategy was."

DR BRETT CAIRNS, CHIEF EXECUTIVE OFFICER

FuturePay Glossary

Term	Definition
Active ETF	Magellan's Active ETFs are actively managed investment funds that are quoted on a securities exchange and can be bought and sold just like any listed stock. These funds provide investors with easy access to the benefits of investing in global equities and the investment experience and expertise of Magellan.
Index Relative Ratio	A measure of whether FuturePay has outperformed the Inflation Target – referred to as the 'Index Unit Price' in the Product Disclosure Statement. Calculated as FuturePay's Portfolio Value per Unit relative to the Index Unit Price.
Inflation Target	One of the key benefits that FuturePay aims to deliver is to grow investors' capital at or above the rate of inflation, even after delivering the target monthly income payments. FuturePay's Inflation Target – referred to as the 'Index Unit Price' in the Product Disclosure Statement – is the initial issue price of Units adjusted for inflation using the Inflation Index published for the most recent quarterly period (applied in arrears). If the value of FuturePay's investment portfolio is above the Inflation Target – this means that FuturePay has both delivered the target monthly income and the value of its investment portfolio has grown at or above the rate of inflation.
MFG Reserve Facility	If the assets in the Support Trust are low, FuturePay can borrow additional funds from Magellan Financial Group to support FuturePay in paying the Target Monthly Income to investors. This is only repayable when the Support Trust reserves have been recovered and FuturePay outperforms its inflation objective.
Mutualisation Amount	The amount you leave behind if you redeem your investment in FuturePay off-market with Magellan via the unit registry. The Mutualisation Amount is retained by FuturePay for the benefit of remaining investors. The Mutualisation Amount is equal to the value of the Support Trust Rights, subject to a cap. The Mutualisation Amount is capped at an amount equal to 7.5% of the estimated NAV per Unit of FuturePay – so when the value of the Support Trust Rights exceeds that cap, these amounts will differ. When an investor redeems their investment in FuturePay off-market with Magellan via the unit registry, the exit price they receive will be the NAV per Unit less the Mutualisation Amount and an allowance for transaction costs.
Portfolio Value	A measure of the size of the assets of FuturePay or the Support Trust (as the case may be).
Reserve Ratio	Reserve Ratio is a measure of the relative size of the assets of the Support Trust to the assets of FuturePay . It is calculated by dividing the Portfolio Value of the Support Trust by the Portfolio Value of FuturePay .
Responsible Entity	Magellan Asset Management Limited is the responsible entity of FuturePay .
Support Trust	The Support Trust is a separate pool of assets managed for the benefit of FuturePay investors. It is structured as a discretionary trust. The Support Trust's objective is to assist FuturePay in delivering a predictable monthly income to investors over the long term. There is no guarantee that the Support Trust will provide income support.

Important Information: Units in the fund referred to herein are issued by Magellan Asset Management Limited ABN 31 120 593 946, AFS Licence No. 304 301 ('Magellan').
