

Technical Notice

Friday 17th May, 2019

Reference Number: 0007/19

Subject: Chi-X Production Upgrade to Version 6.0 on 24th June and Enhanced Ability to Cancel Trade Reports

Chi-X is enhancing the facility that currently allows for Participants to cancel their own Trade Reports as follows:

- Currently the login which enters the trade report may also cancel the trade report;
- In addition, participants will be able to cancel trade reports from both the login that submitted the trade report and the fix login that has been designated as the recipient of the unsolicited contra-side of the trade report.

Please note that this extension is entirely optional and, as per the current trade report cancellation mechanism, only available via the FIX Trading interface.

This update will be enabled in the Participant Test Environment (**PTE**) and available for testing from **Monday 20th May**.

The Version 6.0 FIX GW technical specification has been updated to cover this optional capability and is available in the [Client Forum](#).

Please note that the **Chi-X Production** Environment will be updated over the weekend of 22nd and 23rd June to Version 6.0 for go-live on **Monday 24th June**. This will enable both:

1. this expanded trade report cancellation capability, and
2. the ability to cancel crossed 'Market On Close' (MOC) trades on Chi-X markets as referenced in the earlier [Technical notice 0003/19](#).

Please [contact the Chi-X Market Operations team](#) with any queries.
